UPDATE: Because all printers are different and some people are reporting that their parts are too tight, I've included a "Loose" version of each file with slightly larger holes and wider gaps. If your prints are challenging to put together you may want to try the loose version.

Snowflake Themed Star Wars TIE Fighter Kit Card can also be used as a Christmas Tree ornament. Hollow or solid wings available to suit your preference. Also contains a version with a ring for hanging and without the ring.

- A filament swap can be done around 2.4mm up to add some detail to the cards. Check your slicer for the proper swap height.
- Individual parts are included so you can print the model without the sprue to save plastic if desired.

- A pdf of instructions is included to print and hand out with the cards if they are given as gifts or stocking stuffers.
- Good bed adhesion is a must for the details to print properly. Cards in the photos were printed on the Prusa Mini Plus.
- Z height may be adjusted slightly up or down if parts are too tight or too loose from your printer.

NOTES:

I've uploaded versions marked as "easy" for people struggling with bed adhesion. They have all solid bottoms with no disconnected parts. The wings and the cockpit won't have any snowflake details on one side, but hopefully it will print. Print the solid wings and the "easy" cockpit parts if printing just the parts. Versions with the ring have been updated to a 2.0 version with a thicker ring as suggested by DocWilco. If you have any issues with the original version you can reprint just 2.0 version of the cockpit piece and replace your original.
